To leverage my expertise in data analysis to drive strategic decision-making and operational efficiency, while continuously expanding my skillset to innovate business processes and deliver measurable value to forward-thinking organizations.

WORK EXPERIENCE

Deloitte - Business Consultant

April 2023 - July 2024

Monterrey, MX

- **Analyzed** annual tax declarations and monthly VAT credit trends for maquiladora companies, identifying patterns to optimize compliance strategies and ensure 100% adherence to Treasury Department regulations.
- **Synthesized complex financial data** to support advisory on asset classification, depreciation modeling, and compliance frameworks, providing actionable insights on regulatory adherence and tax efficiency.
- **Led cross-functional client sessions** to uncover root causes of tax disputes and provided data-driven solutions, minimizing financial exposure and driving resolution of complex cases.
- **Managed cross-year tax planning** using historical financial data for two key corporate accounts, leveraging trend analysis and scenario modeling to optimize refund applications and provisional payments.

Hobetus - Accounting Intern

Sep 2022 - Feb 2023

Monterrey, MX

- **Monitored financial activity** for over 10 SMEs and individuals using Contapaqi software, generating timely reports and uncovering spending trends to inform client decisions.
- **Performed reconciliation analysis** on diverse transaction types, identifying variances and ensuring alignment with internal controls and accounting standards.
- **Prepared regulatory datasets** for social security filings through the IDSE platform, aligning monthly third-party reports with local labor and tax legislation.

HJM International Logistics - Accounting Jr

May 2022 - Aug 2022

San Diego, CA

- **Collaborated with department heads** to analyze budget data, uncover cost-saving opportunities, and present strategic allocation recommendations to management.
- **Customized and interpreted QuickBooks data**, producing financial dashboards and insights that enhanced decision-making and reporting accuracy.
- **Revamped accounts receivable workflows**, using data analysis to prioritize collections and reduce bad debt by 25%, while improving liquidity forecasting.
